

## ALL NATURAL LOTION ANTI-PERSPIRANT FOOT

Professional Products

### BACKGROUND:

**Perspiration is a normal and indispensable physiological process that hydrates the skin, eliminates toxins produced in the body and provides thermal regulation.**

**But sometimes, excess perspiration can be secreted. In addition to the discomfort caused by constant humidity in your shoes, there are unpleasant odors caused by bacterial growth.**

### INDICATIONS:

- Excess perspiration
- Unpleasant odors

### PROPERTIES:

- Sage and cypress are both powerful natural astringents: they tighten sweat pores.
- This lotion cleanses via natural antiseptic and fungistatic compounds: myrrh and lemon.
- Douglas fir provides a pleasant fragrance.

### RECOMMENDATIONS FOR USE:

- On clean and dry feet, apply in the morning and at night for 10 days, then use regularly once a day.
