

DOUBLE PROTECTION INNER SOCKS with Epithelium 26®

BACKGROUND:

When the feet are very deformed by serious pathologies, e.g. polyarthritis, multiple corns, plantar pain, calluses, painful Hallux Valgus, Quintus Varus, etc., it is often necessary to protect the entire forefoot from all pressure or excessive rubbing.

INDICATIONS :

- Pressure on the ball of the foot
- Hallux Valgus
- Quintus Varus
- Hammer toes

PROPERTIES :

- The Inner socks include Epithelium 26® to distribute pressure in the plantar area (2 mm thick) and dorsal area (1mm thick). The size has been minimized, but consider the thickness of the booties when choosing house slippers or shoes.
- These booties are worn like socks and provide thermal protection, which is useful for those with reduced blood circulation. They provide warmth to the feet even when circulation is poor.

RECOMMENDATIONS FOR USE:

- Wear directly against the skin. Wear socks, tights or stockings over the device for optimal comfort.
- To determine the correct size, measure the width of your foot at the widest point.
- Can be machine-washed at 40°C.
- Average duration of use: several months.

References	Size	Size / width of foot	Unit
0501	Small	8 – 10 cm / 3.2”– 4”	One pair
0502	Medium	10 – 11.5 cm / 4”- 4.6”	One pair
0503	Large	> 11.5 cm / > 4.6”	One pair
