## ALL NATURAL JOINT CREAM

### BACKGROUND:

**All of our joints eventually show signs of wear. The back and spinal column are the first to be affected since they are heavily solicited, but other joints can also be sources of pain: hips, knees, hands, etc. This can be partly explained because the body contains less water with age: the “machine” is less “lubricated”, cartilage is not as smooth, and the “gears” start to stick. Movement then becomes a nightmare.**

### INDICATIONS:

- Intense joint pain caused by sprains, tendonitis, luxations and osteoarthritis.

### PROPERTIES:

The three essential oils act in synergy for great effectiveness:

- Birch is known for its calming properties.
- Juniper is known for its calming effect.
- Pine was chosen for its positive effect on pain.

### RECOMMENDATIONS FOR USE:

- Massage the cream into joints whenever fatigue is felt.
