

ALL NATURAL SOOTHING AND REVITALIZING MASK FOR FEET

BACKGROUND:

We must take care of our feet like we take care of our face. If we neglect them, we leave the door open to various lesions (cracking, corns, etc.) that can be very painful. To avoid putting pressure on uncomfortable areas, we unconsciously adopt a different posture which, over the long term, can cause problems elsewhere on the body (knees, pelvis, etc.).

INDICATIONS :

- Calluses
- Cracked heels
- Dry, painful feet

PROPERTIES :

- Gotu Kola extract (a plant originating in the East Indies) stimulates new cell growth.
- This mask nourishes and softens with apricot oil.
- Bisabolol and Lavender oil soothe red, irritated feet.
- This product prevents the formation of calluses with its high concentration of natural hydrating agents (plant glycerin).

RECOMMENDATIONS FOR USE:

- As a reparative treatment, apply the mask twice a week for one month. Leave on for 15 minutes, then rinse with warm water. Carefully dry your feet after use.
